

**Occupational Certificate: Production Process Controller**

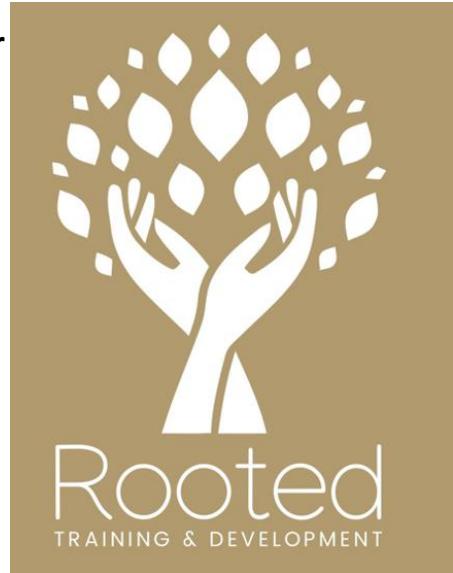

**SAQA ID: 119977**

**NQF 4**

**140 Credits**

**QCTO - MerSeta**

**Learnership Registration Number:** 32Q320324051404

### **Purpose**

The purpose of this qualification is to prepare learner to operate as a Production Process Controller. A Production Process Controller conducts a range of administrative and control functions in the monitoring and control of a production process plant. This is done through a combination of electrical, electronic, mechanical, hydraulic, pneumatic, and/or computer technologies. Compliance with occupational health, safety and environmental requirements as well organisational standards, policies and procedures is an integral part the operational profile as well as routine/minor/first-line maintenance work where required.

### **Duration +- 13 months (excluding EISA Exam)**

Class training days: 54 days (Knowledge & Practical Modules)

75 days (Workplace Experience)

**Total: 129 days**

### **Entry Requirements**

NQF 3 qualification with Mathematical Literacy

### **Assessment**

EISA Exam to be written off-site after completion of Knowledge, Practical and Workplace Experience Modules. This Exam is external and not administered by Rooted. QCTO sets EISA exam dates.

## Exit Level Outcomes

A qualified learner will be able to:

- Carry out production plant operational and administrative processes, duties, and functions, applying and exercising policies, procedures, performance parameters, controls, and operating standards.
- Use applicable knowledge to operate, monitor, and control production plant operations, applying and exercising policies, procedures, performance parameters, controls, and operating standards.
